SKILLS

- Python
- Machine Learning
  - scikit-learn
- Deep Learning
  - TensorFlow
  - PyTorch
- Computer Vision
  - OpenCV
- Wolfram Mathematica
- MATLAB
- PostgreSQL
- Front-end
  - HTML
  - CSS
    - Bootstrap
  - JavaScript
- Microsoft Office Program's

PERSONAL INITIATIVES

- Kastamonu Üniversitesi Matematik & Bilim Topluluğu **(Founding President)**
- Türkiye Matematik Kulübü **(Member)**

EDUCATION INFORMATION

- KASTAMONU UNIVERSITY FACULTY OF SCIENCE AND LITERATURE MATHEMATICS - 2022 Graduate - Bachelor's Degree

PROJECTS

- **Face Detection:** Is a face detection project on photos, videos and snapshots.
- **Road Lane Lines Detection:** It is a project to detect lane lines on roads for autonomous vehicles in which artificial intelligence is actively involved.
- **Garbage Classification with Convolutional Neural Network (CNN):** Classification process using CNN for 6 different types of solid waste.
- **Object Detection and Segmentation with YOLOv8:** Object detection&segmentation project from photographs, videos and snapshots with the 8th version of the YOLO algorithm.
- **Vehicle Recognition with Instance Segmentation Training on a Custom Dataset:** It is a project to train the model with segmentation method on 20 randomly selected cars, pickups and trucks and to measure model success on 5 randomly selected cars, pickups and trucks.
- **YOLOv8 Pose Trained on MS-COCO Data:** It is a pose detection project using the YOLOv8 model on the MS-COCO dataset.
- **Facial Expression Recognition:** Expression recognition project on randomly selected images on 7 different classes trained with efficientnet_b0 model using PyTorch on FER-2013 dataset.
- **Vehicle Speed Estimation:** It is an object tracking and speed calculation application for estimating the speed of vehicles. The YOLO model is used to detect objects within the video and these detections are used for the confidence threshold and for limiting objects within a given region.

CERTIFICATES

- Machine Learning Specialization **Stanford University & DeepLearningAI**
- Computer Vision Basics **University at Buffalo & The State University of New York**
- Introduction to Self-Driving Cars **University of Toronto**
- Deep Learning Specialization **DeepLearningAI**
- Introduction to Structured Query Language (SQL) **University of Michigan**
- Mastering Programming with MATLAB **Vanderbilt University**
- Version Control **Meta**
- Programing with JavaScript **Meta**
- Convolutional Neural Networks in TensorFlow **DeepLearningAI**
- System Engineering **MathWorks**
